

## Spis publikacji 2009

1. D. Kołodyńska, H. Hubicka, Z. Hubicki, Studies of application of monodisperse anion exchangers in sorption of heavy metal complexes with IDS, *Desalination*, 239 (2009) 216.
2. D. Kołodyńska, Żywice chelatujące w procesie usuwania jonów metali ciężkich w obecności czynnika kompleksującego z wód i ścieków, *Przemysł Chemiczny*, 88 (2009) 182.
3. D. Kołodyńska, H. Hubicka, Polyacrylate anion exchangers in sorption of heavy metal ions with non-biodegradable complexing agents, *Chemical Engineering Journal*, 150 (2009) 308.
4. D. Kołodyńska, Polyacrylate anion exchangers in sorption of heavy metal ions with the biodegradable complexing agent, *Chemical Engineering Journal*, 150 (2009) 280.
5. D. Kołodyńska, E. Skwarek, Z. Hubicki, W. Janusz, The effect of adsorption of Pb(II) and Cd(II) ions in the presence of EDTA on characteristic of electrical double layer at the ion exchanger/NaCl electrolyte solution interface, *Journal of Colloid and Interface Science*, 333 (2009) 448.
6. D. Kołodyńska, Iminodisuccinic acid as a new complexing agent for removal of heavy metal ions from industrial effluents, *Chemical Engineering Journal*, 152 (2009) 277.
7. D. Kołodyńska, Z. Hubicki, S. Pasieczna-Patkowska, FT-IR/PAS studies of Cu-EDTA complexes sorption on chelating ion exchanger, *Acta Physica Polonica A*, 116 (2009) 340.
8. G. Wroński, A. Dębczak, Z. Hubicki, Application of the FT-IR/PAS Method in Comparison of Ga(III) and In(III) Sorption on Lewatit OC-1026 and Amberlite XAD-7 Impregnated D2EHPA, *Acta Physica Polonica A*, 116 (2009), 435.
9. A. Łodyga, A. Turczyn, Z. Hubicki, Technologia produkcji węgla guanidyny o wysokiej czystości, *Przemysł Chemiczny*, 88 (2009) 1343.
10. Z. Hubicki, E. Zieba, G. Wojcik, J. Ryczkowski, FT-IR/PAS and SEM EDX Studies on Aluminosilicates Modified by Cs(I), Th(IV) and U(VI), *Acta Physica Polonica A*, 116 (2009) 312.
11. P. Rusek, Z. Hubicki, G. Wójcik, A. Dębczak, Application of the FT-IR/PAS and DRS Methods for Studying Heavy Metal Ions Sorption on the Inorganic Sorbents, *Acta Physica Polonica A*, 116 (2009) 407.
12. G. Wójcik, Z. Hubicki, J. Ryczkowski, Investigations of Chromium(III) and (VI) Ions Sorption on SIR by using Photoacoustic and DRS Methods, *Acta Physica Polonica A*, 116 (2009) 432.

13. M. Wawrzkievicz, Z. Hubicki, Application of nitroso-R-salt in modification of strongly basic anion-exchangers Amberlite IRA-402 and Amberlite IRA-958, *Desalination*, 249 (2009) 1228.
14. M. Leszczyńska, Z. Hubicki, Application of weakly and strongly basic anion exchangers for the removal of brilliant yellow from aqueous solutions, *Desalination and Water Treatment*, 2 (2009) 156.
15. M. Wawrzkievicz, Z. Hubicki, Kinetics of adsorption of sulphonated azo dyes on strong basic anion exchangers, *Environmental Technology*, 30/10 (2009) 1059.
16. M. Wawrzkievicz, Z. Hubicki, Removal of tartrazine from aqueous solutions by strongly basic polystyrene anion exchange resins, *Journal of Hazardous Materials*, 164 (2009) 502.
17. M. Wawrzkievicz, Z. Hubicki Equilibrium and kinetic studies on the adsorption of acidic dye by the gel anion exchanger, *Journal of Hazardous Materials*, 172 (2009) 868.
18. M. Wawrzkievicz, Z. Hubicki, Kinetic studies of dyes sorption from aqueous solutions onto the strongly basic anion-exchanger Lewatit MonoPlus M-600, *Chemical Engineering Journal*, 150 (2009) 509.
19. Z. Hubicki, A. Wołowicz, M. Wawrzkievicz, Application of commercially available anion exchange resins for preconcentration of palladium(II) complexes from chloride–nitrate solutions, *Chemical Engineering Journal*, 150/1 (2009) 96.
20. A. Wołowicz, Z. Hubicki, Palladium(II) complexes adsorption from the chloride solutions with macrocomponent addition using strongly basic anion exchange resins, type 1, *Hydrometallurgy*, 98 (2009) 206.
21. Z. Hubicki, A. Wołowicz, A comparative study of chelating and cationic ion exchange resins for the removal of palladium(II) complexes from acidic chloride media, *Journal of Hazardous Materials*, 164 (2009) 1414.
22. A. Wołowicz, Z. Hubicki, Sorption of palladium(II) complexes onto the styrene-divinylbenzene anion exchange resins, *Chemical Engineering Journal*, 152 (2009) 72.
23. Z. Hubicki, A. Wołowicz, Adsorption of palladium(II) from chloride solutions on Amberlyst A 29 and Amberlyst A 21 resins, *Hydrometallurgy*, 96 (2009) 159.
24. M. Greluk, Z. Hubicki, Sorption of SPADNS azo dye on polystyrene anion exchangers: Equilibrium and kinetic studies, *Journal of Hazardous Materials*, 172 (2009) 289.
25. M. Majdan, M. Bujacka, E. Sabah, A. Gładysz-Płaska, S. Pikus, D. Sternik, Z. Komosa, A. Padewski, Unexpected difference in phenol sorption on PTMA- and BTMA-bentonite, *J. Environ. Management* 91 (1) (2009) 195.
26. A. Gajowiak, M. Majdan, K. Drozdal, Sorption of uranium(VI) on clays and clay minerals, *Przemysł Chemiczny*, 88 (2) (2009) 190.

27. E. Sabah, M. Majdan, Removal of phosphorus from vegetable oil by acid-activated sepiolite, *J. Food. Eng.* 91/3 (2009) 423.
28. M. Majdan, E. Sabah, M. Bujacka, S. Pikus, A. Gładysz-Płaska, Spectral and equilibrium properties of phenol–HDTMA- and phenol–BDMHDA-bentonite as a response to the molecular arrangements of surfactant cations, *J. Mol. Struct.*, 938 (2009) 29.
